## **EXPLANATION FOR MIS GPS 001 REPORT**

MIS GPS001 report includes vehicle locations, speeds, directions, Chicago Police Units and personnel IDs of the vehicles, and other information during the requested timeframe.

The report consists of two parts; (1) maps on which vehicle locations are marked, and labeled with index numbers, and (2) a table of detail information including x, y coordinates, speeds, directions and airbag activities for each marked location on the map. The following explains each part in detail.

## Map:

The map report contains a snapshot of vehicle locations during the requested time frame, for each vehicle. The GPS Device ID, Vehicle number, Unit and Personnel ID are displayed at the bottom.

The blue arrows (►) indicate the locations of the vehicle. And the numbers next to the blue arrows are the index numbers (ID) in the attached spreadsheet (table).

Also the arrow shows the direction that the vehicle was heading to at that time.

For the detail information of each location data such as speed and direction, please see the table attached.

### **Spreadsheet (Table):**

This table provides more information about each location data, marked on the maps. The following explains each column of the table.
